PROTECTING YOUR INVENTION OUTSIDE THE UNITED STATES

Since the rights granted by a U.S. patent extend only throughout the territory of the United States and have no effect in a foreign country, an inventor who wishes patent protection in another country must apply for a patent in a specific country or in regional patent offices. Applicants may wish to consider the filing of an international application under the Patent Cooperation Treaty (PCT). An international (PCT) application generally has the same effect as a regular national patent application in each PCT-member country. The PCT process **simplifies** the filing of patent applications on the same invention in member countries, but **does not result** in a grant of "an international patent" and does not eliminate the need of applicants to file additional documents and fees in countries where patent protection is desired.

Almost every country has its own patent law, and a person desiring a patent in a particular country must make an application for patent in that country in accordance with its particular laws. Since the laws of many countries differ in various respects from the patent law of the United States, applicants are advised to seek guidance from specific foreign countries to ensure that patent rights are not lost prematurely.

Applicants also are advised that in the case of inventions made in the United States, the Director of the USPTO must issue a license before applicants can apply for a patent in a foreign country. The filing of a U.S. patent application serves as a request for a foreign filing license. The application's filing receipt contains further information and guidance as to the status of applicant's license for foreign filing.

Applicants may wish to consult the USPTO booklet, "General Information Concerning Patents" (specifically, the section entitled "Treaties and Foreign Patents") for more information on timeframes and deadlines for filing foreign patent applications. The guide is available either by contacting the USPTO Contact Center at 800-786-9199, or it can be viewed on the USPTO website at <http://www.uspto.gov/web/offices/pac/doc/general/index.html>.

For information on preventing theft of your intellectual property (patents, trademarks and copyrights), you may wish to consult the U.S. Government website, <http://www.stopfakes.gov>. Part of a Department of Commerce initiative, this website includes self-help "toolkits" giving innovators guidance on how to protect intellectual property in specific countries such as China, Korea and Mexico. For questions regarding patent enforcement issues, applicants may call the U.S. Government hotline at 1-866-999-HALT (1-866-999-4158).

**LICENSE FOR FOREIGN FILING UNDER
Title 35, United States Code, Section 184
Title 37, Code of Federal Regulations, 5.11 & 5.15**

GRANTED

The applicant has been granted a license under 35 U.S.C. 184, if the phrase "IF REQUIRED, FOREIGN FILING

LICENSE GRANTED" followed by a date appears on this form. Such licenses are issued in all applications where the conditions for issuance of a license have been met, regardless of whether or not a license may be required as set forth in 37 CFR 5.15. The scope and limitations of this license are set forth in 37 CFR 5.15(a) unless an earlier license has been issued under 37 CFR 5.15(b). The license is subject to revocation upon written notification. The date indicated is the effective date of the license, unless an earlier license of similar scope has been granted under 37 CFR 5.13 or 5.14.

This license is to be retained by the licensee and may be used at any time on or after the effective date thereof unless it is revoked. This license is automatically transferred to any related applications(s) filed under 37 CFR 1.53(d). This license is not retroactive.

The grant of a license does not in any way lessen the responsibility of a licensee for the security of the subject matter as imposed by any Government contract or the provisions of existing laws relating to espionage and the national security or the export of technical data. Licensees should apprise themselves of current regulations especially with respect to certain countries, of other agencies, particularly the Office of Defense Trade Controls, Department of State (with respect to Arms, Munitions and Implements of War (22 CFR 121-128)); the Bureau of Industry and Security, Department of Commerce (15 CFR parts 730-774); the Office of Foreign Assets Control, Department of Treasury (31 CFR Parts 500+) and the Department of Energy.

NOT GRANTED

No license under 35 U.S.C. 184 has been granted at this time, if the phrase "IF REQUIRED, FOREIGN FILING LICENSE GRANTED" DOES NOT appear on this form. Applicant may still petition for a license under 37 CFR 5.12, if a license is desired before the expiration of 6 months from the filing date of the application. If 6 months has lapsed from the filing date of this application and the licensee has not received any indication of a secrecy order under 35 U.S.C. 181, the licensee may foreign file the application pursuant to 37 CFR 5.15(b).

DECISION ON PAPERS

UNDER 37 CFR 1.42

This decision is in response to the applicant's declaration filed 02 February 2007 in the United States Patent and Trademark Office (USPTO). The filed declaration is being treated as a request for status pursuant to 37 CFR 1.42. No petition fee is due.

BACKGROUND

On 30 July 2004, applicant filed international application PCT/JP04/10929, which claimed priority to an earlier application filed 01 August 2003. A copy of the international application was communicated to the United States Patent and Trademark Office from the International Bureau on 10 February 2005. Pursuant to 37 CFR 1.495, the thirty-month period for paying the basic national fee in the United States expired at midnight on 01 February 2006.

On 25 January 2006, applicant filed a transmittal letter for entry into the national stage in the United States which was accompanied by the requisite basic national fee as required by 35 U.S.C. 371(c)(1) and an Information Disclosure Statement.

On 12 September 2006, applicant filed an executed combined declaration and power of attorney.

On 02 February 2007, applicant filed a supplemental combined declaration and power of attorney.

DISCUSSION

37 CFR 1.42 When the Inventor is Dead, states, in part:

"In case of the death of the inventor, the legal representative (executor, administrator,

Application No.: 10/566,057

2

etc.) of the deceased inventor may make the necessary oath or declaration, and apply for and obtain the patent.”

Applicant's originally filed declaration of 12 September 2006 was non-compliant under 37 CFR 1.497(b) as it did not provide the citizenship, residence, and mailing address of both the deceased inventor and the legal representative. Applicant has presently provided a newly executed declaration which provide all of the required information for both the deceased inventor, Shingo Nishimura and the legal representative, Hideo Nishimura. Therefore, it is appropriate to grant applicant's petition at this time.

CONCLUSION

Applicant's request for status under 37 CFR 1.42 is GRANTED.

This application has an international application filing date of 30 July 2004 and will be given a date of **02 February 2007** under 35 U.S.C. 371(c)(1), (c)(2) and (c)(4).

This application is being returned to the DO/EO/US for processing in accordance with this decision.
